

Product Datasheet

--PT Series

Product name: Metal Enclosure

Product description: PT series metal enclosure is wall mounting type, used to protect the electrical parts assembled inside with simple, flexible interior installation.

Product purpose: Applied for controlling and power distribution safety performance in low voltage area, it's waterproof and dustproof. We secure cable routing to a high standard protection.

ANJI HUACHENG ELECTRICS CO., LTD.

Product structure: PT series metal enclosure is mainly made of cold rolling steel, thickness: door & body: 1.2mm, mounting plate: 1.5mm for the height less than 800mm, door & body: 1.5mm, mounting plate: 2mm for over 800mm high.

Protection: PU foaming sealing gasket ensures a protecting grade to box body

Powder coating in RAL 7032/RAL 7035 or any other customized color for door & body, the inside mounting plate is coating in orange/galvanized,

Plastic locking system on the reversible hinged door--130° opening, foaming polyurethane gasket inside door, gland plate on the bottom, 2XM6 earth studs, 6pcs of sealing caps for the 4 hanging holes for the wall mounting brackets on the back, 2 hinge holes on the left, supplied good sealing performance on the enclosure.

Metal locks with waterproof cap is also alternative, which offers better performance on IP66 rating.

No plexiglass door, no inner door, no earthing wire, no door stop, no wall mounting brackets for the standard PT series.

Surface treatment: Clean substrate with spirit wipe before painting. Use electrostatic gun to remove static. Wipe off grease and dust, remove static.

Epoxy thermosetting powder coating, textured finish.

Operating temperature: -20°C~+50°C

Product approvals: RoHS, CE, IP66, IK10

Production Line: ISO9001
